

## WORK UMBRELLA

The Work Umbrella is made from polyester fabric with fibreglass rods. The frame and assembly are aluminium and plastic. It can be mounted on any smooth, flat surface by means of the vacuum activated suction cups. It is ideal for use on outdoor cabinets, vehicles and bucket trucks.

## CANOPIES

A light weight, one piece canopy is attached to a cabinet or vehicle using an aluminium extruded track assembly. The track is applied to the cabinet or vehicle by a peel and stick "3M" adhesive tape, and is permanent. Once in place, the canopy may be installed and dismantled within seconds. Adjustable aluminium legs at the front allow for multiple cabinet heights. Has optional sidewalls which are secured to the canopy by a "Velcro" style closure.

## FREE STANDING SHELTER

This shelter is fully self supporting with adjustable aluminium legs. Height is adjustable from 4 ft to 8 ft and the shelter comes in two standard sizes of 8 ft x 10 ft (2.44 x 3.05 M) and 10 ft x 12 ft (3.05 x 3.65 M). Optional sidewalls are available which are secured to the shelter by means of a "Velcro" style closure.

## LIGHTS

Lights are rugged and shock protected against dropping or falling and are precision engineered from non-breakable, non-combustible materials. Cool to the touch, easy on the eyes and colour corrected. Available in 120 volt AC or 12 volt DC. Standard lamps are 8,15, 20, 30 and 40 watt and come with either 25 or 50ft cords.

# INDUSTRIAL SHELTERS

## WHO WOULD USE ARDLIN TENTS ?

- Police
- Fire Services
- Ambulance Services
- Communications
- Water
- Gas
- Electricity
- Outside field workers

## TENT SPECIFICATIONS:

- Lightweight
- Erected in seconds
- Made from 250 denier polyester
- Urethane coated
- No interior obstructions
- Flame retardant
- Mildew resistant
- Non conductive
- Fibreglass rod structure
- Carry bag and stakes
- Standard colour yellow & white
- Other colours available

## DOOR DESIGNS

All designs come with a carry case and 3 tent stakes.

### “A” Model

Includes two screen windows with roll up flaps, three tie down cords through the hub, ground flaps, single zippered front door, exterior roof line loops for tie down.

### “D” Model

Includes two screen windows with roll up flaps, three tie down cords through the hub, ground flaps, heavy duty frame, wide open front, snap and loops with interconnectable flaps (connect 2 tents together), ventilation hose entry sleeve, roof loops for tie down and optional rear door on 6508 and 6510 models.

### “Z” Model

Includes two screen windows with roll up flaps, three tie down cords through the hub, ground flaps, heavy duty frame, wide open front, dual zipper roll up door, ventilation hose entry sleeve, interior and exterior roof line loops for tie down.

### Decontamination Tent

One piece instant shelter creates a workspace of 24' x 16' and can be erected in under 2 minutes. Can be equipped with options such as showers, fresh air ventilation, heating, lighting and hot water. Designed for hazmat decontamination, emergency response and major terrorist incidents.
